PINONS UPDATES

The deck replacement project is slated to begin this spring, following ski season. The scope of work includes the demolition of all frontal decks over garage structures, followed by the installation of a new waterproof membrane over each garage roof. New decking will be comprised of a composite material. Each home will also receive new metal railings, posts and caps. The whole project is designed to update the look of the homes while providing a relatively maintenance free deck, moving forward.

The Board will be working with Kerry Wallace, legal counsel on a complete revision of your Declarations of Covenants, Conditions & Restrictions. We hope to have a draft of this document for the owners' review and discussion later this year.

RISK MANAGEMENT CORNER: Water Damage Prevention

Leaks and water damage are the primary reason for insurance claims for community associations. You can help do your part to prevent damage, claims and insurance rate hikes by doing the following:

If you notice a discoloration or stain on your ceiling or any walls, call management immediately. The cause could be a roof leak!

Toilets and Garbage Disposal. Do not put anything but SOFT toilet paper down your toilet (NEVER any feminine products, Kleenex, Puffs or towelettes); use your garbage disposal sparingly and do not put coffee grounds or fibrous material down your drain in order to keep sewer lines clear.

Place a catch pan under your clothes washer and water heater. **If your water heater is more than 10 years old, you should replace it.** Drain your hot water heater annually to prevent the buildup of sediment and corrosion.

Repair any drip in a sink, bathtub or shower and any running toilets immediately. Dripping faucets and leaky toilets greatly increases water costs.

Regularly replace your **washing machine hose.**

Insulation and Heat Tape. Add insulation or heat tape to any water lines that are in cold or poorly heated areas. These include under kitchen sinks, utility room or vented areas. Make sure all internal plumbing fixtures are sealed and caulked well.

Insurance Considerations:

Homeowners at Pinons currently need to insure their home from the "walls in," along with its contents, personal possessions and upgrades to developer-conveyed finishes. If you have not recently reviewed your HO-6 policy with your insurance agent, NOW is a great time to do so. Homeowners should be sure to have adequate coverage, including loss assessment, loss of use, building and property and adequate liability insurance. We have seen both the costs for premiums and replacement values escalate in the past few years. The cost of reconstruction in the event of a complete or partial loss is increasing due to the rising costs for materials and labor. And claims throughout the insurance industry for wildfires, floods, hurricanes, and tornadoes have caused rates in Eagle County to increase as well. If you'd like a referral for a local agent in order compare rates and coverage, please call our office.

Local Resources for Homeowners

EAGLE RIVER WATERSHED COUNCIL 2022 COMMUNITY PRIDE HIGHWAY CLEANUP April 30 | 9:00 AM

Every year, hundreds of dedicated volunteers participate in the county-wide Community Pride Highway Cleanup.

From its inception in the early 2000's, in which nearly 50 tons of trash had accumulated and was removed, great strides have been made to reduce littering, and now an average of 10-15 tons of debris is removed annually.

Volunteers consist of school groups, corporate teams, residents and visitors alike, and we encourage anyone who is interested to join in the fun! Please email cleanup@erwc.org to confirm your segment, sign up for a new one or join an existing team.
